# PIEDMONT PLANTS

1938

## *Greetings to Our Friends, Old and New:*

In presenting this our 1938 catalog we wish to extend thanks to our customers for the many orders we have received in the past, and our sincere wish to continue to serve them.

The many advantages of FIELD-GROWN Vegetable plants over home-grown or greenhouse plants have become well known. **PIEDMONT PLANTS** will save you money and trouble.

To get the best results from Southern Field-Grown Plants we wish to stress the importance of buying on quality rather than price. Small, inferior, trashy plants are expensive at any price. By careful selection and packing we deliver to you only those plants that are fit to set out. Such plants are cheaper than a bunch of trash grabbed up and sold at a low price.

Read our guarantee. It is your protection.

Cordially yours,

**PIEDMONT PLANT CO.**

---

## *What your dollars bring in Plants from Piedmont*

1. Guaranteed quality plants at reasonable prices.
2. Money-saving Garden Collections (Page 12).
3. Bargain Special Offers (inside cover).
4. Valuable gifts for ordering early (back of order sheet).

## **PIEDMONT FIELD GROWN PLANTS**

The market gardener who grows vegetables for early market knows how important it is to get crops on the market early, if large profits are to be realized. The home gardener also wants early vegetables. To get an early start it is necessary to grow seedlings in hot beds, transplanting them to cold frames to harden. The best and cheapest solution of the problem is to set Piedmont Field Grown Plants.

We offer in this catalogue a line of high grade Field Grown Vegetable Plants for early setting that we guarantee to give satisfaction. The business of growing and shipping vegetable plants has developed tremendously in the past 20 years. Hundreds of millions of plants are shipped annually to truckers, market gardeners, and home gardeners, who find it more profitable to buy plants than to attempt to grow them.

## **QUALITY IN PLANTS**

**SUITABLE CLIMATE NECESSARY.** Every year millions of plants are shipped from along the Gulf Coast and South Texas, where the climate is mild, that are not well hardened, and are not suitable for early setting. In the middle south the climate is adapted to growing plants in the open, which are hardy enough to set in the open farther north. Our farms are located where there is enough cold weather to grow plants hardy enough to set in the open field.

**SELECTED PLANTS.** Piedmont Plants are grown from high grade seed, and will be found true to type and variety. Our plants are hand selected, and are large enough to set in the field. No small, inferior, trashy plants shipped. We ship you the kind you order, properly labeled, and full count guaranteed.

# REAL FROST-PROOF CABBAGE PLANTS

The Frostproof Cabbage Plant has become so well known that it is hardly necessary to point out its advantages.

On our farms the soil and climate are especially adapted to the growing of hardy, tough, healthy cabbage plants. The plants make a slow growth during the early part of the winter and spring, and soon become very tough and hardy. They will stand a temperature of 20 degrees above zero without injury and can be shipped to territory with a colder climate. Light snows, sleet, and moderate freezes will not hurt them, and they can be set in the open four to six weeks earlier than hotbed plants. The top of the plant does not grow, but the root becomes established, enabling the plant to make a rapid start, and mature headed cabbage two or three weeks earlier.

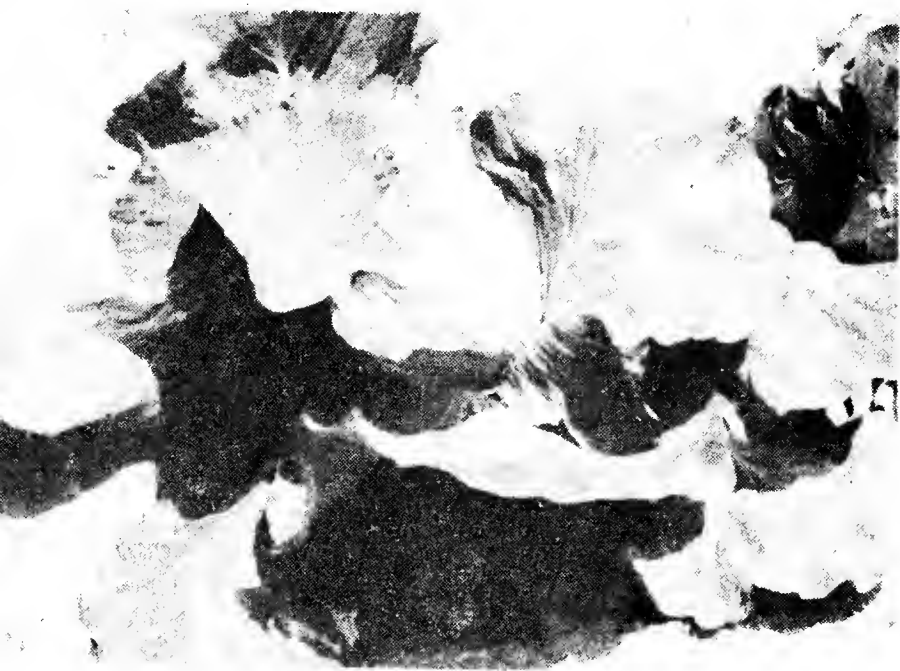

Piedmont Field grown Frostproof Cabbage Plants will produce bumper crops early enough to get top prices.

## HOW TO USE OUR FROSTPROOF CABBAGE PLANTS

For early cabbage select a deep sandy loam with southern exposure. Apply broadcast ten to fifteen loads of well rotted stable manure to the acre and plow in. Harrow the land thoroughly and lay off the rows east and west three feet apart. Drill in the furrows 500 to 1,000 pounds of high grade fertilizer to the acre and mix well with the soil. Bed on this and then run a small furrow in the top of the bed. Set the plants in this open furrow 15 to 20 inches apart for Wakefield, Golden Acre and Copenhagen Market, and 24 inches for larger varieties. The plants should be set deep in the ground up to the first leaf to keep the stem from freezing. When the ground begins to get warm cultivate frequently and apply 200 pounds of nitrate of soda to the acre.

# VARIETIES OF **Frost-Proof Cabbage Plants**

## **EARLY JERSEY WAKEFIELD**

Many market gardeners consider this the very best cabbage in cultivation for early market, and is more largely grown than any other early cabbage. Its merits are many, among which are uniformity in earliness and crop. The head is pointed in shape, of medium size, and is white, solid and tender. It is beyond question the best variety for early market and always brings a good price on account

of its earliness, thereby netting the grower large returns. Our strain of this variety is the very best. Ready Jan. 1st to July.

## **CHARLESTON WAKEFIELD**

This is a selection of the Early Jersey Wakefield but makes a much larger head, and a week to ten days later. It stands pre-eminent as the best spring cabbage for the South. It is probably more largely planted for shipment than any other variety. The heads are of uniform size, and maturity, and of very large size for an early cabbage. A strong favorite with Southern growers as a main crop. Ready Jan. 1st to July.

## **GOLDEN ACRE**

A selection of the Copenhagen Market with heads a little smaller but matures earlier. Earliest of the round head varieties. A splendid new variety becoming very popular. Ready Jan. 1st to July.

## **COPENHAGEN MARKET**

This is the very earliest of the round headed varieties. Its chief features besides earliness are remarkable size, averaging 10 pounds, compactness, even maturity, fine quality. Maturing at about the same time as the Early Jersey Wakefield, it produces larger heads than any other cabbage equally as early. The heads are heavy in weight, ball shaped, solid and firm, with a small core, fine texture and splendid quality. Ready Jan. 1st to July.

## EARLY FLAT DUTCH

This variety needs no recommendation, because it is one of the largest in cultivation, the heads are very solid, distinctly flattened on top and of excellent quality. It invariably forms very large and at the same time very hard heads, uniform in size and shape. It has a very short stem, and is a very compact grower, forming few loose leaves. Ready Jan. 1st to July.

## DANISH BALL HEAD OR HOLLANDER

Most widely used and the best of late cabbages; desirable for shipping, for storage and for kraut. Plants medium with short stem. Heads very attractive, deep, round, extremely solid. Plants ready April 1st to July.

## SAVOY, DRUMHEAD

The best of the Savoy type for general use; an excellent keeper. Heads nearly round, full and hard; leaves large, coarsely crimped, dark bluish green; of good quality. Plants of this variety ready April 1st to July.

## MAMMOTH RED ROCK

Large, round heads, solid as a rock, and red throughout. Used extensively for pickling. A good keeper. Ready April 1st to July.

## PRICES ON CABBAGE PLANTS

## YELLOWS OR WILT RESISTANT VARIETIES

These varieties will produce a good crop of cabbage on land infested with yellows disease where ordinary varieties fail. Ready April 1st.

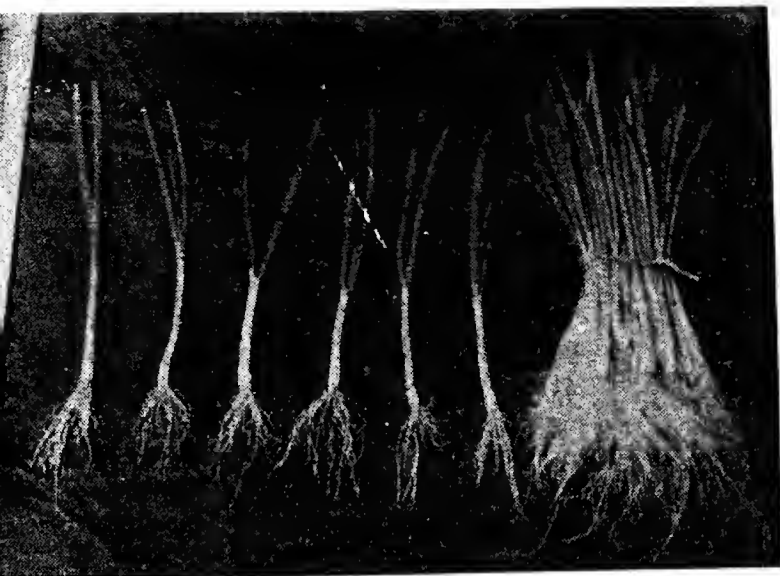

MARION MARKET—Copenhagen Type.

WISCONSIN ALL-SEASON—Midseason variety.

Prices on Yellows Resistant Varieties: Postpaid: 500 for \$1.50; 1,000 for \$2.50. Express Collect: 1,000 for \$1.50; 5,000 for \$6.25; 10,000 and over at \$1.00 per 1,000.

# FROST-PROOF ONION PLANTS

Southern grown onion plants are no longer an experiment. Large quantities are set out every year, and they are rapidly displacing sets.

They will grow large, sweet onions early, and are good keepers. They produce onions two to three times larger than sets, and seldom run to seed. They can be set early, the same time you would put out sets or cabbage plants. Therefore we strongly advise you to use our plants instead of sets, whether for the market or home use. Piedmont Onion Plants are grown from the very best seed, and will be found true to name. Ready Jan. 1st to July.

## VARIETIES

**YELLOW BERMUDA.** The most popular and widely planted of the Bermuda varieties. It is sometimes called the White Bermuda although it is a light yellow or straw color. This is a thin flat shaped onion, and very sweet; many people eat them like an apple.

**CRYSTAL WAX BERMUDA.** One of the most attractive onions grown. It is a clear, waxy white onion, and has the same delightful mild flavor as the Yellow Bermuda. It is the same shape as the Yellow Bermuda.

**PRIZETAKER.** The largest and most handsome of the yellow varieties. It is light yellow in color and globe shaped, and grows to a large size. The flesh is white, and mild, and it is a good keeper.

**VALENCIA OR SWEET SPANISH.** A globe shaped onion, light yellow in color, and grows as large as the Prizetaker. It is mild in flavor, a good yielder and a splendid keeper.

## PIEDMONT LETTUCE PLANTS

While not quite so hardy as cabbage and onion plants, our Lettuce plants will stand considerable frost and cold weather. Thousands of carloads of Iceberg and New York Improved Lettuce are shipped from California each year. Good head lettuce can be grown in the home garden. Set out some of our plants this year instead of buying your lettuce. Set out at about the same time as cabbage. Plants ready Jan. 1st.

**VARIETIES:** Iceberg, New York Improved, New York No. 12.

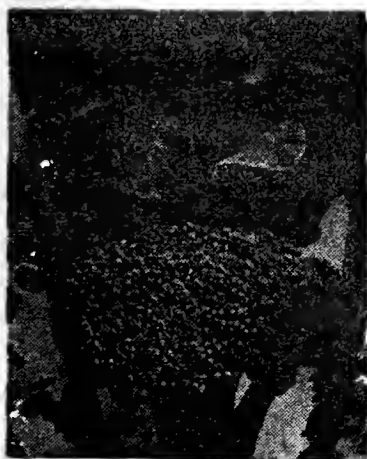

**PRICES:** By Mail Postpaid—100 for 50c; 500 for \$1.50; 1,000 for \$2.50. By Express or Parcel Post Collect—500 for 90c; \$1.75 per 1,000; 5,000 for \$7.50.

## PIEDMONT BROCCOLI PLANTS

Ready April 1st—Calabrese Improved, Green Sprouting. A delicious vegetable, steadily gaining in favor. Similar to cauliflower, but hardier.

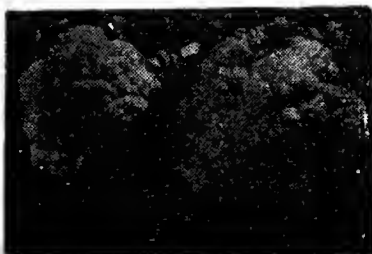

**PRICES:** By Mail Postpaid—100 for 50c; 500 for \$1.50; 1,000 for \$2.50. By Express Collect—\$1.75 per 1,000; 5,000 for \$7.50.

## PIEDMONT CAULIFLOWER PLANTS

Ready April 1st. Our cauliflower plants are hardy and may be set earlier than home grown plants. Variety: Early Snowball, best and most widely used variety.

**PRICES:** By Mail Postpaid—50 for 50c; 100 for 75c; 500 for \$2.00; 1,000 for \$3.00. Express Collect—\$2.50 per 1,000; 5,000 for \$10.00.

## PIEDMONT BEET PLANTS

Set our beet plants for early crop. Varieties: Detroit Dark Red, Crosby Egyptian. Ready April 1st.

**PRICES:** By Mail Postpaid—100 for 50c; 500 for \$1.50; 1,000 for \$2.50. By Express Collect—\$1.75 per 1,000; 5,000 for \$7.50.

Tomato Plants in the Open Field

## **PIEDMONT FIELD-GROWN TOMATO PLANTS**

During the past five years there has been a tremendous increase in the use of Southern field-grown tomato plants. They have proven to be the most satisfactory and economical solution of the tomato plant problem in the north both for large canning factories and home gardeners.

Piedmont Field-Grown Tomato Plants are grown in the open field where they are acclimated to outdoor temperature, which enables them to be set in the open field. They are not frostproof as it is impossible to grow frostproof tomato plants. However, they are not like the tender seedlings you get from a greenhouse, but are large, stalky plants, hardy enough to make a quicker start than greenhouse plants.

Our field-grown tomato plants are grown from the best certified seed, which is disinfected before planting on disease free land. They are thoroughly sprayed by high pressure sprayers from the time they come up. This insures you true to name, disease free plants.

Our plants are carefully selected in the field as they are pulled one at a time. Each plant has a well developed root system. Many people think tomato plants are too tender a plant to ship long distances successfully. However, the way we wrap them with damp moss and paper, and pack them in special crates, we can deliver them in good condition anywhere east of the Rockies.

Start your tomato crop right with **PIEDMONT FIELD-GROWN PLANTS**. Ready any time between April 15th and June 15th.

**CULTURAL DIRECTIONS:** Tomatoes do well on a wide variety of soils, and the use of fertilizer will depend on the soil. For early tomatoes set our field grown plants in 3½ foot rows, 2 feet apart as soon as danger of frost is over. For earlier setting they may be protected in the field with "hot-caps." For earliest fruitings, pinch off all side shoots, and tie the single stem to a stake. For ordinary field crop, set plants 4 feet each way in checks and cultivate both ways.

### VARIETIES

**EARLIANA.** The Earliana is probably the earliest tomato grown, and is very popular for early market. The fruit is deep scarlet, medium to large size, and smooth for an early tomato.

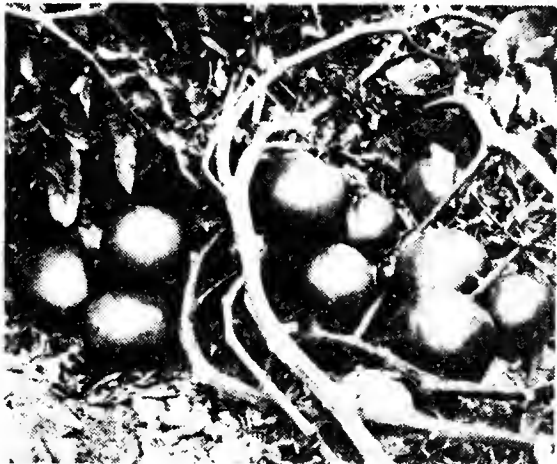

**BONNY BEST.** A fine variety- for early market and home garden. Vines are vigorous and fruit bright scarlet in color, and uniform in ripening.

**PRITCHARD OR SCARLET TOPPER.** A wilt resistant variety similar to the Marglobe but earlier. It is disease resistant and very productive. The fruit is scarlet, large, smooth and globular in shape.

**MARGLOBE.** Wilt resistant tomato developed by U. S. Department of Agriculture. Fruit medium size, smooth and solid; globe shape, scarlet color, good shipper. Has become very popular for main crop.

**RUTGERS.** A new wilt resistant variety rapidly coming into favor in the eastern canning sections. Similar to the Marglobe in many characteristics, it produces slightly larger fruit and more foliage. Scarlet in color, it ripens from the inside out.

**GREATER BALTIMORE.** A mid-season variety, very popular for main crop and canning. Probably more of this variety used by large canners than any other variety. Very dependable, producing extra heavy crop of large firm tomatoes.

Rutgers

# Extra Early Tomato Plants

In order to supply a demand for early tomato seedlings for transplanting in cold frames or under hot caps, we are offering this year plants started under cover. These plants are shipped smaller than the field-grown plants, and are of suitable size for spotting out in cold frames. As we have to grow these plants under cover in order to have them early, they cost more than field-grown plants. We will have them ready Mar. 20th.

# Sweet Potato Plants

## VARIETY: PORTO RICO

Our Potato Plants are grown from selected seed stock grown on our own farms. They are treated for all kinds of disease, and are government inspected. Our customers are therefore protected from the many kinds of potato plant diseases which are becoming so prevalent throughout the South.

All potato plant orders are booked and shipped in the order in which they are received. We advise you to place your order early, stating when you want them shipped. We advise you to have potato plants shipped by express. Ready April 20 to July 1.

**HOW TO GROW SWEET POTATOES:** A warm, well drained, sandy loam is the best land for sweet potatoes. After plowing and harrowing thoroughly, lay off rows 3 feet apart and drill 500 to 1,000 pounds of commercial fertilizer, containing plenty of potash but not much nitrogen. List on the fertilizer, and knock off the top of the ridge. Set the plants 15 inches apart. Cultivate thoroughly until the vines begin to run. Harvest when mature or when frost kills the vines. Store in a warm cellar or building where the temperature does not go below 50 degrees.

## PRICES ON POTATO PLANTS

## PIEDMONT PEPPER PLANTS

Our Pepper Plants like Tomato Plants are suitable for setting in the open after danger of frost is over. Our plants are field grown and therefore more hardy than hotbed plants. Good plants carefully packed. Plants ready April 15th to June 1st.

**VARIETIES:** Sweet—California Wonder, Ruby King; Hot—Long Red Cayenne.

**PRICES:** By Mail Postpaid—50 for 50c; 100 for 75c; 500 for \$2.00; 1,000 for \$3.00. By Express—\$2.50 per 1,000; 5,000 for \$10.00.

# PIEDMONT EGGPLANT PLANTS

Our Eggplant Plants are field grown like the tomato and pepper plants. Large plants ready for field setting. Ready April 20th to June 15th.

Variety: Black Beauty.

Prices: By Mail Postpaid—50 for 50c; 100 for 75c; 500 for \$2.00; 1,000 for \$3.00. By Express Collect—\$2.50 per 1,000; 5,000 for \$10.00.

## EXPRESS SHIPMENTS

Due to the fact that the Express Companies have reduced their rates nearly 30%, while parcel post rates are the same it is cheaper to order your plants by express in lots of 2,000 and over to a shipment. We give below a scale of express charges per 1,000 plants to different states. We will prepay your order by express if you add the right amount according to this scale to your remittance at Express Prices. We do not prepay orders if you do not send the money with the order.

### EXPRESS CHARGES PER 1,000 PLANTS

VARIETY	Georgia, Florida, Alabama, S. C.	Miss., La., Ark., Tenn., Ky., Va., N. C.	Tex., Okla., Mo., Ia., Ill., Ind., Ohio, Wis., Mich., Pa., N. Y., N. J., Md.	All Other States East of Rockies.
Beets -----	.20	.30	.40	.50

# PACKING AND SHIPPING

Our plants are carefully packed in light, wire bound, wood veneer crates, as shown in the illustration. From long experience we find these crates are much superior to any other kind of container. They will stand rough handling, will not crush in like paper boxes, and are so ventilated as to deliver the plants to you in perfect condition. All plants are tied in bunches of 50, the tops are ventilated and the roots protected from exposure to the air. We guarantee to deliver plants anywhere in the United States.

## TERMS

Our terms are cash with order or C. O. D. Collect mail shipments can be sent C. O. D. for postage if there is a money order office at your post office. C. O. D. mail orders can be shipped C. O. D. for plants and postage.

## SUGGESTIONS TO CUSTOMERS

**NAME, ADDRESS, ETC.** We wish to impress upon you the importance of writing your name and full address plainly. If your express office is different from your post office, be sure to give it. We receive orders every year with faulty addresses, which cause unnecessary delay.

**REMITTANCES.** You can send money safely by P. O. order, bank draft, or check, and registered letter. Do not send stamps.

**ORDERING DIFFERENT VARIETIES OF PLANTS.** We do not ship less than 100 plants of any variety. If you order cabbage, onion, tomato plants, etc., at the same time, make your remittance to cover the quantity of each kind of plant you order at prices quoted. If you wish to make your order in advance for tomato and potato plants you may do so by giving the date you wish the order shipped. By making one order this will be a saving to you.

**CARE OF PLANTS.** As soon as your plants come, take them out of the crates and set them out. If you are not ready to set them out, trench them out in damp earth.

**NON-WARRANTY.** While we exercise great care to have our plants pure and reliable, we give no warranty expressed or implied. We cannot be in any way responsible for the crop.
